The Honda ATC125M was a three-wheeled All Terrain Cycle released in 1984, and received a major revision in 1986. The model was sold through 1987, when Honda voluntarily discontinued sales of ATC's. The first iteration can trace its development back to Honda's first ATC, the Honda US90, released in 1970, while the second iteration borrowed heavily from the ATC200 line.

This is a barn fresh 1984 Honda ATC 125m. It was purchased from the original owner, so it is clean and in great shape! It's got new holeshot tires, a new air filter, a new chain, and has all new fluids. All it would need to be perfect is a new battery for the electric start to work. It runs great though - starts on the first or second pull.

The automotive industry appears close to substantial change engendered by “self-driving” technologies. This technology offers the possibility of significant benefits to social welfare—saving lives; reducing crashes, congestion, fuel consumption, and pollution; increasing mobility for the disabled; and ultimately improving land use. This report is intended as a guide for state and federal policymakers on the many issues that this technology raises.
