"You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. The Lonely City is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. Part memoir, part biography, part dazzling work of cultural criticism, The Lonely City is not just a map, but a celebration of the state of loneliness. It's a voyage out to a strange and sometimes lovely island, adrift from the larger continent of human experience, but visited by many - millions, say - of souls"--

Look, a White! returns the problem of whiteness to white people. Prompted by Eric Holder's charge, that as Americans, we are cowards when it comes to discussing the issue of race, noted philosopher George Yancy's essays map out a structure of whiteness. He considers whiteness within the context of racial embodiment, film, pedagogy, colonialism, its "danger," and its position within the work of specific writers. Identifying the embedded and opaque ways white power and privilege operate, Yancy argues that the Black countergaze can function as a "gift" to whites in terms of seeing their own whiteness more effectively. Throughout Look, a White! Yancy pays special attention to the impact of whiteness on individuals, as well as on how the structures of whiteness limit the capacity of social actors to completely untangle the way whiteness operates, thus preventing the erasure of racism in social life.
