INTRODUCTION TO STATISTICS - KSU

Statistics is a branch of mathematics used to summarize, analyze, and interpret a group of numbers or observations. We begin by introducing two general types of statistics: •• Descriptive statistics: statistics that summarize observations. •• Inferential statistics: statistics used to interpret the meaning of descriptive statistics.

In this first module, we'll
introduce the basic concepts
of descriptive statistics.
We'll talk about cases and
variables, and we'll explain
how you can order them in a
so-called data matrix. We'll
discuss various levels of
measurement and we'll show
you how you can present your

There are two basic types of
statistics: descriptive and
inferential. Descriptive
statistics are the simplest
type and involves taking the
findings collected for
sample data and organising,
summarising and reporting
these results. In many cases
this will be all the
