Beckman Gold Hplc User Manual  
The System Gold HPLC instrument separates sample components within a liquid chromatographic column usually constructed from stainless steel tubing and packed with a coated silica matrix, though alumina, porous polymer particles or ion-exchange resins are also used. The separation takes place using one of several modes of chromatography.

## Complete Product Description - VTP UP

I know that the Beckman HPLCs used a control board known as a Gold Board to control their systems. This board is specific to the Beckman HPLC systems and since it is made by Beckman is the only way of using computer control with this instrument. If you are willing to use a Windows 2000 OS computer they do still have the older version of there 32Karat software (version 5) available for free. It ...
