Based on the Jan van Tonder novel with the same title. It tells the story of a 1966 railway community, told through the eyes of an eleven year old boy, called Timus. Timus and his family are trapped within the structural violence caused by the government and the church at the time.

Roepman (2011) - IMDb

I found that eventhough it was a translation of the original Roepman it was a compelling read. Still I noted that some of the important aspects of the book that only were apparent in afrikaans were missing. So I would suggest to read the original if it is possible or later watch the movie Roepman, which captures the essence of the book well.

Hierdie gewilde roman is nou ook 'n rolprent! 'n Diep menslike en dikwels baie snaakse roman oor jong Timus se inisiasie in die grootmensewêreld. Hy is agter by sy maats oor die soet en duister dinge van die lewe, maar hy het 'n sterk verbeelding

Advances in Immunology, a long-established and highly respected publication, presents current developments as well as comprehensive reviews in immunology. Articles address the wide range of topics that comprise immunology, including molecular and cellular activation mechanisms, phylogeny and molecular evolution, and clinical modalities. Edited and authored by the foremost scientists in the field, each volume provides up-to-date information and directions for the future. This volume focuses on tumor immunology. Contributions from leading authorities Informs and

updates on all the latest developments in the field

This volume summarizes the new developments that made subcellular proteomics a rapidly expanding area. It examines the different levels of subcellular organization and their specific methodologies. In addition, the book includes coverage of systems biology that deals with the integration of the data derived from these different levels to produce a synthetic description of the cell as a system.

Chronicles the lives and works of over eight hundred women composers of Western classical music, giving for each a detailed biography, an evaluation of her music and career, and a list of published and unpublished works

The ciliopathies are a group of rare diseases that often affect multiple systems within the body, and are caused by defects in the function or structure of cilia. When cilia go wrong, there are profound consequences; these are discussed in detail for the first time in *Ciliopathies: a reference for clinicians*. The book provides a clinical overview and reference to this newly emergent group of disorders ranging from Alström syndrome to putative ciliopathic disorders. Each chapter provides an in-depth discussion on a specific disorder, including the latest scientific research together with a description of its features, and practical guidelines on diagnosis. The authors also examine the evidence for dysfunction of cilia in cancer and more common disorders. *Ciliopathies: a reference for clinicians* will appeal to those involved in the care of patients with ciliopathies, including specialists in the fields of nephrology, diabetes, cardiology, and ophthalmology, and non-clinical researchers interested in cilia biology.

This book will contain the proceedings of the XIV International Symposium on Retinal Degeneration (RD2010), held July 13-17, 2010, in Mont-Tremblant, Quebec, Canada. The volume will present representative state-of-the-art research in almost all areas of retinal degenerations, ranging from cytopathologic, physiologic, diagnostic and clinical aspects; animal models; mechanisms of cell death; candidate genes, cloning, mapping and other aspects of molecular genetics; and developing potential therapeutic measures such as gene therapy and neuroprotective agents for potential pharmaceutical therapy.
