- Building this model requires a moderate level of modeling skill and an intimate familiarity with the International Space Station structure – see http://www.nasa.gov/mision_pages/station/main/index.html • Model is approximately 1:40 scale; sized to use 2 liter soda bottles to shape the modules. The finished model will be 6 feet high across the main solar arrays, just over 8 feet wide across the main truss, and about five feet long along the main spine where the modules mount.
