A guide for facility managers of varying types of facilities including, apartment buildings/complexes, office buildings, retail stores, educational facilities (schools), restaurants, and countless others. It will look specifically at the physical similarities inherent in all buildings/facilities and delve into the operational/maintenance needs, access control, audit procedures and emergency procedure requirements. It provides procedures and policy direction in facilities that are lacking such formalized doctrine and gives a starting point to run their facilities in a consistent manner with a focus on safety and security, as well as keeping control of liability risk.

This book was written specifically to provide the facility manager with virtually all information needed to build and manage an effective security system for any type of facility. Topics include facility layout, distances and separation, fencing, access control, intrusion detection systems, pass key and key control systems, locks, hasps, gates, etc. Also explored are more sophisticated systems such as closed circuit TV, microwave transmitters, lasers, lighting, clear zone, computer access control, thumbprint and retinal scan access control, voice print analysis, and hand geometry. In addition, non-hardware aspects of security are examined, including security clearances and background checks, guards, rounds, shift work, training, and procedure development.

The current state of the facility management world is dynamic and evolving. More and more facility managers are participating in the design and construction of the buildings that they will eventually operate. Technologies such as building information modeling (BIM) offer ways to bridge the gap between the design and construction phase and the operation of buildings by making much more information available than existed in the past. We are also starting to see the emergence of the importance of a properly educated workforce in facility management. Emerging trends and issues include the effective utilization of performance management tools, Corporate Social Responsibility, and the Triple Bottom line. This book captures, in a practical and utilitarian way, information, best practices, and processes that will assist facility managers in addressing these trends as well as ongoing challenges. It provides a set of benchmarks, reference points and guidance that will enable the facility management community to be better informed and prepared in the execution of its mission. It serves as a great resource for those who are veterans in the community as well as those who are new entrants to or are examining the career opportunities within.
